

# Crowdfunding in Europe: State of the Art in Theory and Practice (FGF Studies in Small Business and Entrepreneurship)

Crowdfunding is becoming an increasingly popular method to finance projects of every kind and scale. This contributed volume is one of the earliest books presenting scientific and research-based perspectives of crowdfunding, its development, and future. The European Crowdfunding Network (ECN) and its scientific work group, together with FGF e.V., invited both researchers and practitioners to contribute to this first state-of-the-art edited volume on crowdfunding in Europe. This book contributes to a better comprehension of crowdfunding, encourages further fundamental research and contributes to a systematization of this new field of research. The book also features expert contributions by practitioners to enhance and complement the scientific perspective. This book can be used as a guideline and shall advance classification in an emerging research field.
