

The Age of Absolutism (Routledge Revivals): 1660-1815

The end of eighteenth century is often regarded as the watershed between the feudal Europe of the Middle Ages and the modern Europe of the nineteenth century and beyond. The chronology covered in this title, first published in 1954, is vast, but covers an intellectually stimulating and exciting period of European history. The pinnacle of absolute monarchy is cemented in Louis XIV's France, eventually giving way to reform and revolution; the Russian Empire becomes an important player on the Western stage under Peter I and Catherine the Great; America achieves independence; and, the ideas of the Enlightenment begin to change the intellectual and religious landscape. Max Beloff analyses the period in fascinating detail in a now reissued title that will be of particular interest to students of Early Modern History, Politics and European diplomacy.
